**Attachments:** 2019-5-28 PRG Calculator assumptions explanations\_YS.docx

Brianna,

Attached for your legal review is a shorter document focused on the PRG Calculator inputs. Lily had put together a longer internal "memo to the file" that includes a lot of useful information. However, after a discussion with Lily on May 17<sup>th</sup>, we realized our main goal at the moment is to give the Navy some language to encourage them to explain the PRG Calculator and any site-specific inputs made for the long-term protectiveness determination as part of the Five-Year Review (FYR). Therefore, I streamlined the document.

Dear Brianna,

Attached for your legal review is a draft internal memo to the file that documents EPA's analysis thus far relating to various issues about radiological cleanup levels. You have already reviewed most of it in other forms. I have highlighted in yellow the two paragraphs that are new to you. John, Yolanda, and I are considering sharing this with the Navy. Below is a draft transmittal email.

Dear Derek and Stephen,

EPA has been analyzing various issues related to radiological cleanup levels. We drafted the attached internal memo to document our rationale for conclusions. We have recommended that the Navy issue its draft PRG Calculator assessments, with detailed explanations of inputs, for public comment. We offer this writeup as potential material you may draw from to provide explanations. Please contact me if you would like to discuss these contents further.
